Spray 'n Go™

Instant Sanitizing System

Your low cost solution to daily sanitizing.

The perfect complement to our routine sanitizing service or a necessary tool for the “do it yourself” organization, the **ClinicalClean™** Instant Sanitizing System will save you time and money while drastically reducing the risks of disease transmission.

The **Spray 'n Go™** system sanitizes more completely and with 95% less time and effort than any previous method available today. This technology is the first safe method for power spraying equipment and facilities with an alcohol based solution combined with a Four Chain Quat – the result is an instant kill and a residual sanitizing agent that is completely safe and virtually unnoticeable!

A fast, effective, no rinse, non-flammable, tested and approved solution for:
Backboards, Stretchers, Stairchairs, Reeves, AEDs, Cuffs, Stethoscopes, Radios, Ambulance Interiors, First Responder and Chiefs' Vehicles, Fire Apparatus, Fitness Equipment, Restrooms, Offices, Break Areas, Kitchens ... the list is literally endless!

Although the **Spray 'n Go™** system matches the strength and effectiveness of the harshest chemicals, it is **certified safe to be applied directly to food contact surfaces without requiring a rinse!** And because it is non-corrosive and non-flammable in application, it can be sprayed directly on electronics, precision equipment, healthcare devices, keyboards, and other water sensitive equipment.

ClinicalClean™ is the premiere Infectious Disease Prevention resource in the tri-state area. For years, **ClinicalClean™** has been disinfecting and sanitizing pre-hospital care facilities and ambulances, minimizing the threat of infectious disease transmission.

Save time. Save money. Save lives.
